EDUCATION

Ho Chi Minh City University of Foreign Languages and Information Technology (HUFLIT)

- Major: Infomation Technology
- Duration: 2021 - 2025
- Graduation classification: Good

Cybersoft Academy

- Course: Front-end Website JavaScript
- Duration: 07/2025 - 01/2026
- Graduation classification:

TECHNICAL SKILLS

Proficient:

- HTML5, CSS3
- JavaScript (ES6+)
- TypeScript
- React.js
- Tailwind CSS
- SCSS / SASS
- Git / GitHub

Familiar:

- Next.js
- Redux Toolkit
- Zustand
- TanStack Query (React Query)
- React Hook Form
- React Router Dom
- Zod
- Styled-Components
- Material UI
- Ant Design

Basic Back-end:

- Node.js
- MongoDB
- PostgreSQL

Tools:

- Figma
- Jira

ABOUT ME

I have just graduated with a degree in Information Technology from the Ho Chi Minh City University of Foreign Languages – Information Technology (HUFLIT). I am eager to begin my career as a Front-End Developer in a professional and dynamic environment where I can apply my knowledge, improve my skills, and gain hands-on experience. My goal in the next 1–2 years is to become a skilled Front-End Developer capable of building high-quality user interfaces and contributing effectively to real-world projects.

CAREER OBJECTIVE

As a motivated and adaptable individual, I aim to grow as a Front-End Developer by continuously improving my technical skills and building user-friendly, high-quality web interfaces. I am committed to learning new technologies, collaborating effectively with cross-functional teams, and contributing meaningfully to real-world projects while delivering value to both users and the organization.

WORK EXPERIENCE

Internship in Information Technology – Business Analyst

LT Information Technology Services Joint Stock Company *11/2024 - 01/2025*

- Researched software development processes and project workflows
- Studied software deployment methods and system implementation
- Participated in real-world projects within cross-functional teams
- Communicated with clients to gather, analyze, and clarify business requirements
- Assisted in documenting requirements, user workflows, and basic functional specifications
- Collaborated with developers to ensure requirements were clearly understood

SOFT SKILLS

- Analytical thinking and problem-solving mindset
- Effective time management and task prioritization
- Clear communication with team members and stakeholders
- Strong teamwork and collaboration skills
- Ability to work independently and self-learn new technologies

OTHER COURSES

Fullstack.edu.vn:

- HTML CSS Pro
- JavaScript Pro
- Node.js & Express.js Basic

Udemy courses:

- React.js
- Next.js
- Node.js
- PostgreSQL
- Git / GitHub

OTHER INFOMATION

Certificate:

- TOEIC: 525 (04/2025)
- Fullstack.edu.vn: HTML CSS Pro, JavaScript Pro

Languagues:

- English (Basic)

PERSONAL PROJECTS

Airbnb Booking Website

GitHub: https://github.com/huynhthaist08/project_capstone_airbnb
Team size: 2 Developers
Role: Frontend Developer (Client-side)
Timeline: Jan 16, 2026 – Jan 28, 2026

Overview:

Developed a full-featured Airbnb-style Single Page Application (SPA) that allows users to search rooms, make bookings, and manage reservations. The system also includes an Admin Dashboard for managing users, locations, and booking records.

Key Features:

- Room search by location and date
- Booking flow with form validation
- JWT-based authentication
- User booking management
- Admin dashboard with full CRUD operations
- Pagination and filtering
- Role-based protected routes

Technical Highlights:

- State management using Redux Toolkit
- Server-state caching and synchronization with TanStack Query
- Form validation with React Hook Form and Zod
- Axios interceptors for attaching access tokens
- Role-based access control
- Modular and reusable component architecture
- RESTful API integration based on Swagger documentation

Challenges & Solutions:

- Solved stale data issues by configuring React Query cache and invalidation strategies
- Optimized unnecessary re-renders through memoization and proper dependency management
- Designed reusable UI components to improve maintainability
- Handled token expiration using refresh token logic

My Contributions:

- Built the entire client-side architecture
- Implemented booking flow and validation logic
- Integrated RESTful APIs
- Developed authentication and protected route system
- Collaborated on Admin Dashboard UI and state management
